

1960- WSU and City declare us a slum. Make plans to "urban remove" us and redevelop community for Wayne State.

1960-1969-Neighborhood goes down because most everybody believes it's going to be torn down anyway.

1970-Community people get it together and stop Wayne's urban renewal plans with court injunction, charging inadequate relocation housing and a lack of citizens participation in the planning process.

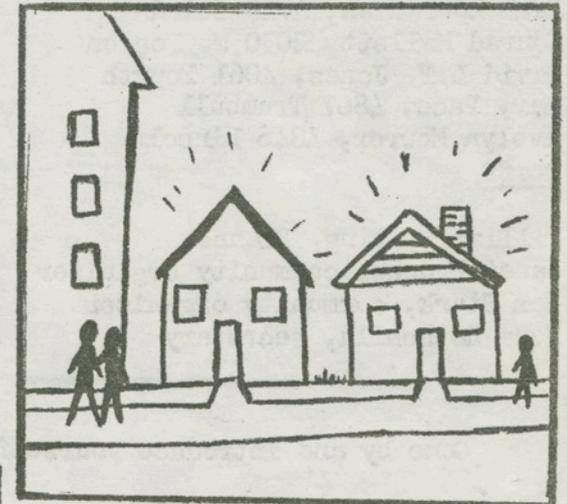

PRESENT-Community people begin drawing up their own plan for how they want their community to be and begin planning for their needs and their future.

1972-UC "A"-CDC succeeds in getting \$70,000 for the people of UC "A" to do a People's Plan for the redevelopment of their area.

The University City "A" Citizens District Council was established by state law to guarantee residents of urban renewal areas participation in the planning of their community. UC "A"-CDC consists of elected and appointed residents and other concerned people, but everybody in the community has a right to say what he/she wants their community to look like. We can plan for our FUTURE!

FUTURE-Fight to get our plan implemented. Fight to control our community's redevelopment so it will benefit us. Fight for better housing, jobs, etc. Fight for ourselves and our kids. FIGHT AND WIN!
